Programming Languages: Java, JavaScript, PHP, DBMS,Vb.Net,C,CPP

Front-end Technologies: HTML, CSS, JavaScript (React),

Back-end Technologies: Node.js, PHP,SQL

WORK EXPERIENCE

TECHSOLVE

Akola, Maharashtra

Full Stack Developer with 0-1 years of experience in both front-end and back-end development. June 2024 – Present

- Spearheaded the development and implementation of a comprehensive ERP inventory software using HTML, CSS, JavaScript, and PHP.
- Developed APIs for placing orders, retrieving order details, and handling login/logout functionality.
- Collaborated closely with clients to gather requirements and translate them into actionable features.
- Demonstrated strong problem-solving skills by resolving technical errors and optimizing data-fetching processes, significantly enhancing system performance and reliability.
- Streamlined database operations in billing software by crafting and optimizing SQL queries at MVD-Tech, improving data retrieval efficiency and boosting system performance by 20%.
- Led the design and implementation of intuitive user interfaces using Bootstrap, enhancing user experience and engagement by 30%, resulting in positive client and end-user feedback.
- Acted as the primary point of contact for client communication, effectively translating client needs into project tasks and deliverables, ensuring alignment with project goals.
- Successfully led multiple projects with a team, handling client communication, project planning, and guiding team members throughout the development process. Completed work on over 30 projects and led several key projects from start to finish.
- Worked on multiple projects involving React.js and RESTful APIs.
- Integrated WhatsApp messaging and email services into applications.
- Proficient in generating PDF reports using FPDF and managing Excel-based data operations.

PROJECTS

TECHSOLVE WEBSITE

June 2024-July 2024

[Link](#)

This website was created for TechSolve Company to introduce its services and provide customer support. It includes a chatbot, email, and WhatsApp API integration to efficiently handle customer queries and support requests..

BITEVIZE

September 2024-Working

This project is based on a hotel management system developed using React.js and APIs for a client in Dubai. It includes multiple new functionalities such as Agent, Restaurant, and Meal modules, with three separate login systems. The project also features trip booking functionality, providing a complete solution for managing hotel operations and enhancing customer experience.
